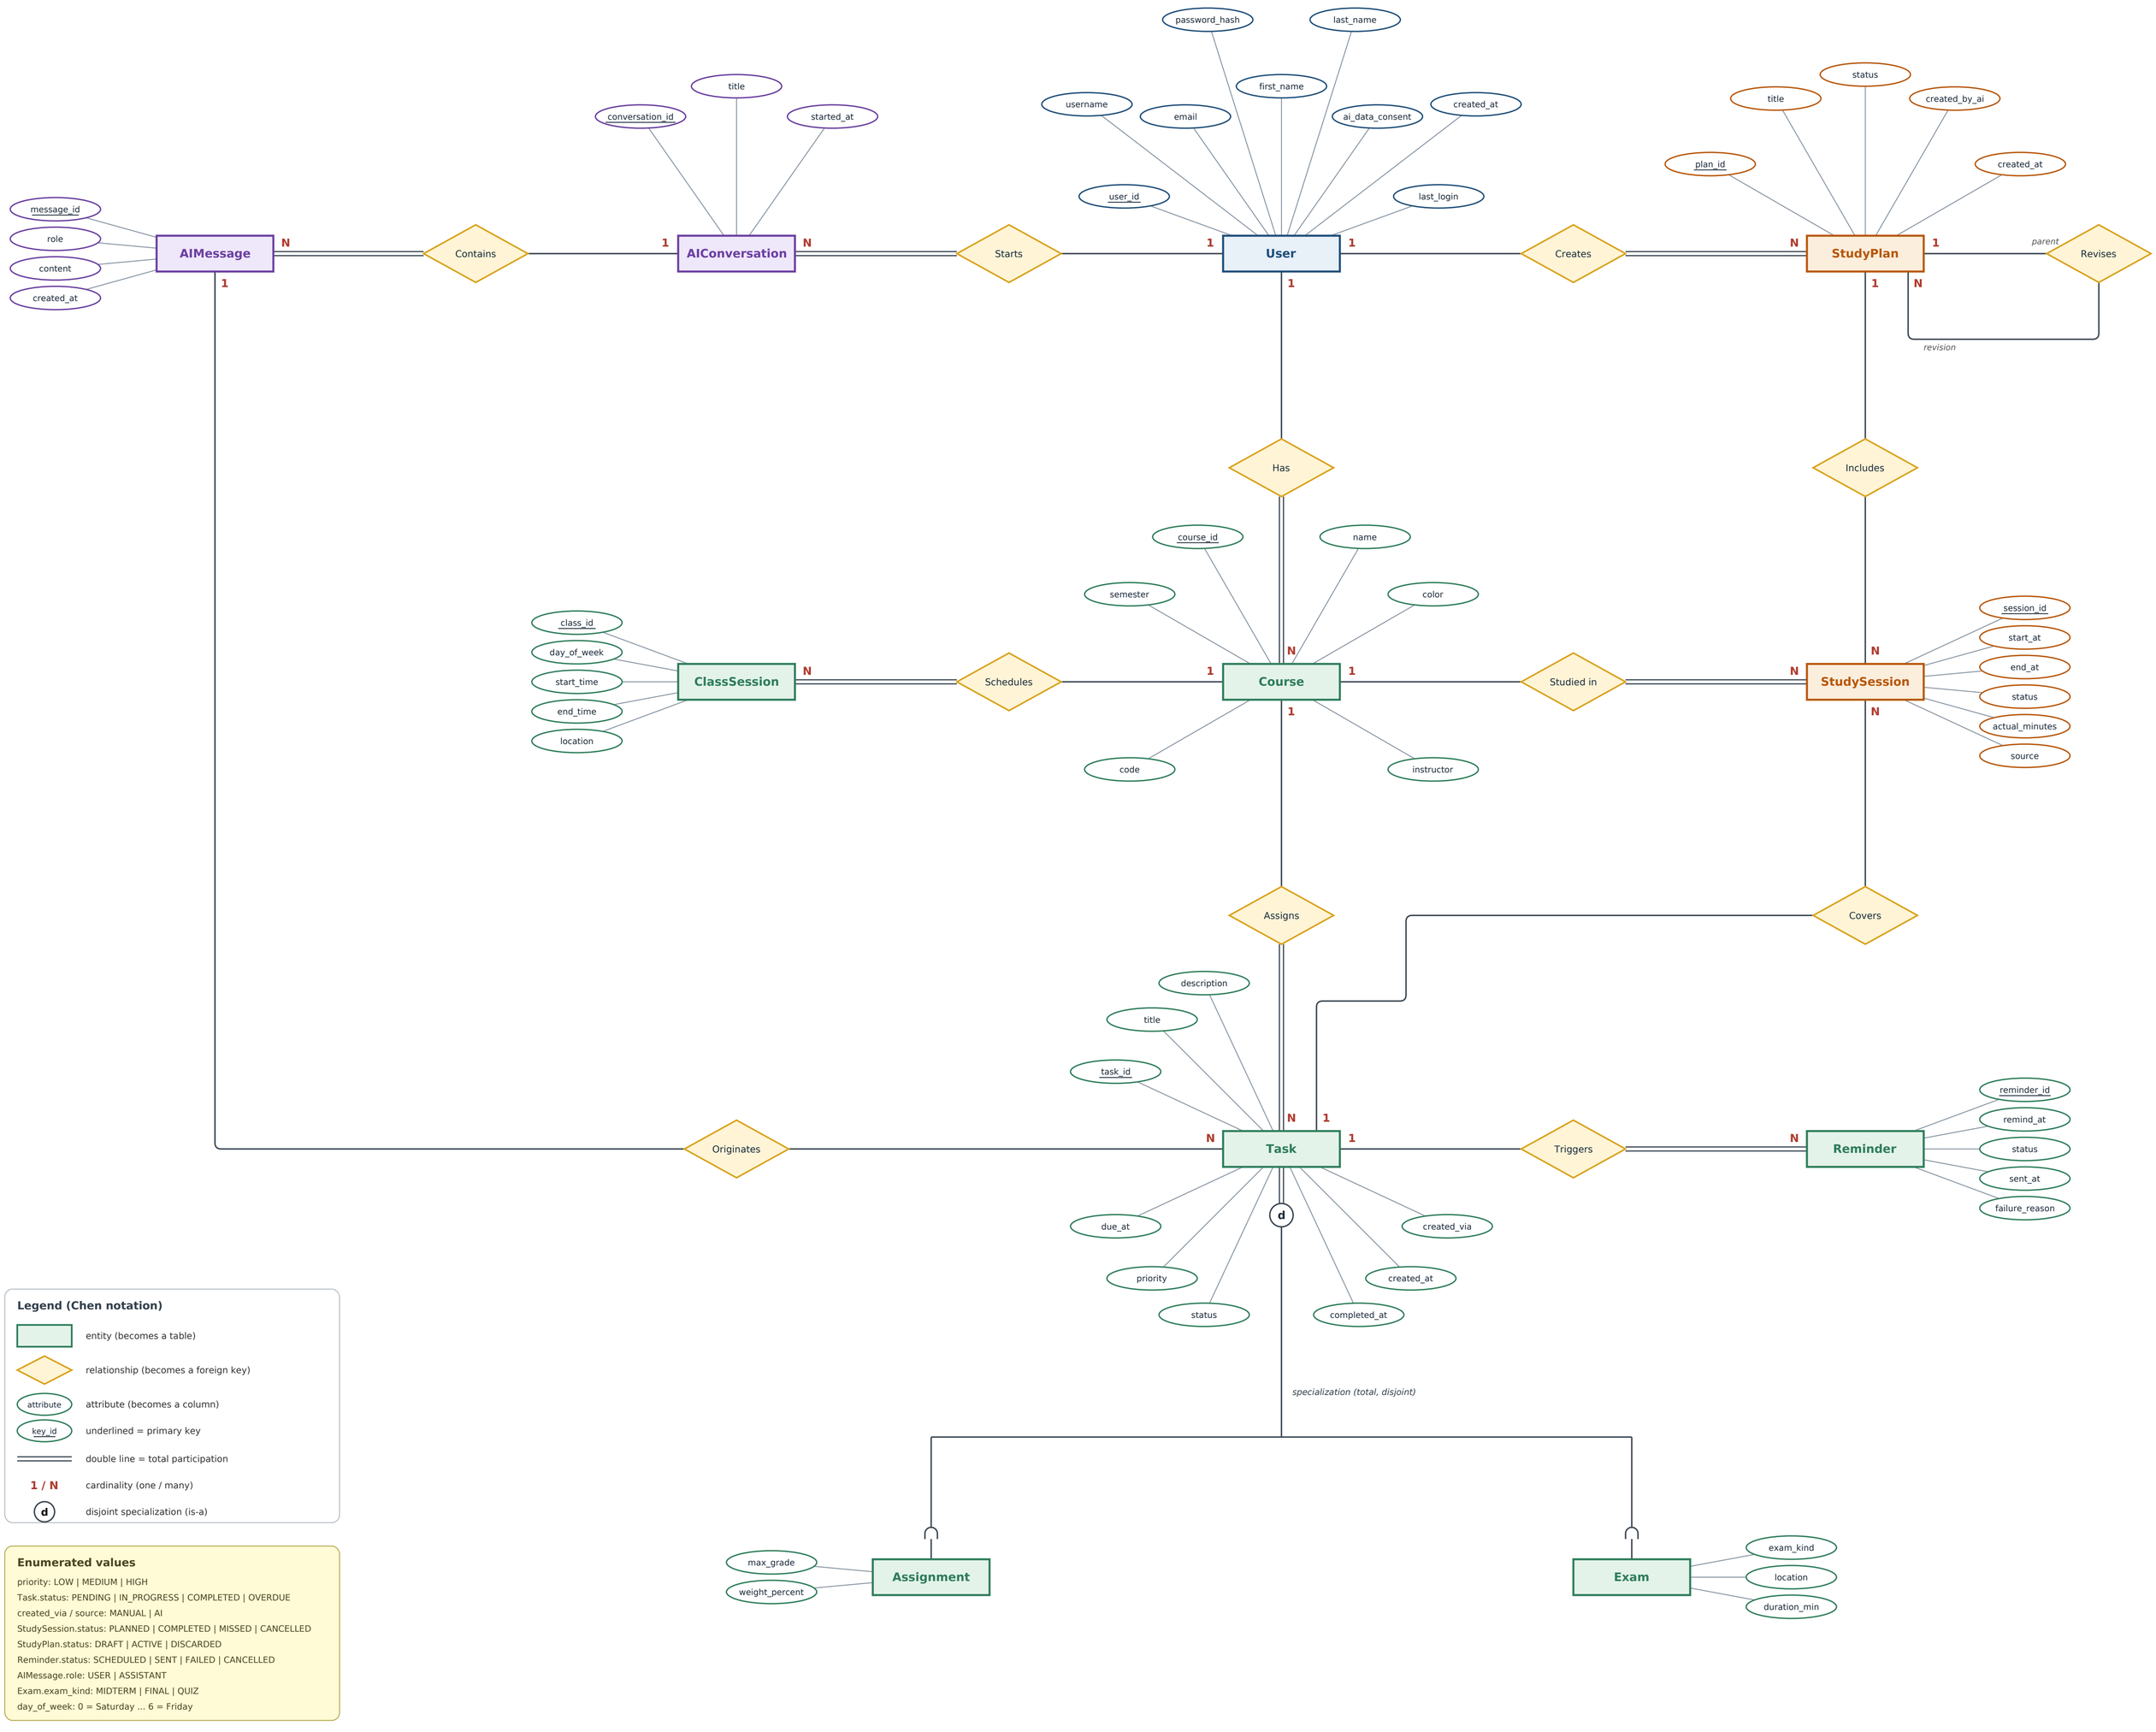
Enhanced Entity-Relationship (EER) Diagram: Chen Notation

AI-Powered Student Planner and Task Management System | entities, relationships, attributes and specialization



Legend (Chen notation)

- entity (becomes a table)
- relationship (becomes a foreign key)
- attribute — attribute (becomes a column)
- key_id — underlined = primary key
- double line = total participation
- 1 / N — cardinality (one / many)
- d — disjoint specialization (is-a)

Enumerated values

priority: LOW | MEDIUM | HIGH
Task.status: PENDING | IN_PROGRESS | COMPLETED | OVERDUE
created_via / source: MANUAL | AI
StudySession.status: PLANNED | COMPLETED | MISSED | CANCELLED
StudyPlan.status: DRAFT | ACTIVE | DISCARDED
Reminder.status: SCHEDULED | SENT | FAILED | CANCELLED
AIMessage.role: USER | ASSISTANT
Exam.exam_kind: MIDTERM | FINAL | QUIZ
day_of_week: 0 = Saturday ... 6 = Friday
